you to do it properly.
- Please stay courteous, polite, respectful, and constructive in all communications during this assessment. The bond of trust between community 21 and you depends on it.
- Highlight possible malfunctions of the work done by the person and take the time to discuss and debate it.
- Keep in mind that sometimes there can be differences in interpretation of the tasks and the scope of features. Please stay open-minded to the vision of the other.

Guidelines

- Evaluate only the files that are on the GIT repository of the student or group.
- Doublecheck that the GIT repository is the one corresponding to the student or the group, as well as to the project.
- Meticulously check that nothing malicious has been used to mislead you and have you assessed something except the content of the official repository.
- If you have not finished the project yet, it is compulsory to read the entire instruction before starting the review.
- Use the special flags in the scale to report an empty or non-functional solution, as well as a case of cheating. In these cases, the assessment is completed and the final grade is 0 (or, in a case of cheating, -42). However, except for a case of cheating, you are encouraged to continue reviewing the project to identify the problems that caused the situation in order to avoid them for the next assessment.
- You must stop giving points from the first wrong exercise even if the following exercises are correct.

Preliminaries

Respect the rules:

Нет ✓ Да

MAIN PART ⌃

Exercise 00 – Work with Classes

- Are there at least 2 classes in the classes package?
- Does each of these classes meet the requirements for its content?
- Does the program operate correctly for each of these classes?
- Does the program output comply with the task?
- Will the program operate correctly if you include your correct class in the classes package?

Нет ✓ Да

Exercise 01 – Annotations – SOURCE

- Do annotations have RetentionPolicy.SOURCE specified?
- Are HTML forms generated when mvn clean compile is executed?
- Does the system generate forms in the target/classes folder?
- Does the program work properly when you include your correct class in the project?
- Open the generated form in a browser. Use the browser developer tools to make sure the form is submitted correctly. Is output in compliance? https://yadi.sk/i/f249BZr8qQMKMQ

Нет ✓ Да

Exercise 02 – ORM

- Do annotations have RetentionPolicy.RUNTIME specified?
- Do classes marked with @OrmEntity annotation comply with requirements?
- Does application output the generated SQL code onto the console during execution?
- Does length parameter of @OrmEntity annotation affect the table row length?
- Does name parameter of @OrmEntity annotation affect the table column name?
- Are all three methods implemented correctly in OrmManager?
- Does OrmManager remove the already created tables?

Нет   ✓ Да
